

IMDATE

FRANCE feedbacks

12th may 2016

Utilization

- A large community of users (167 recorded in March 2016) representing all profiles of administrations which are interested in maritime surveillance : customs, immigration police, maritime gendarmerie, navy, repression of illegal traffic, civil security.
- Organization of training sessions

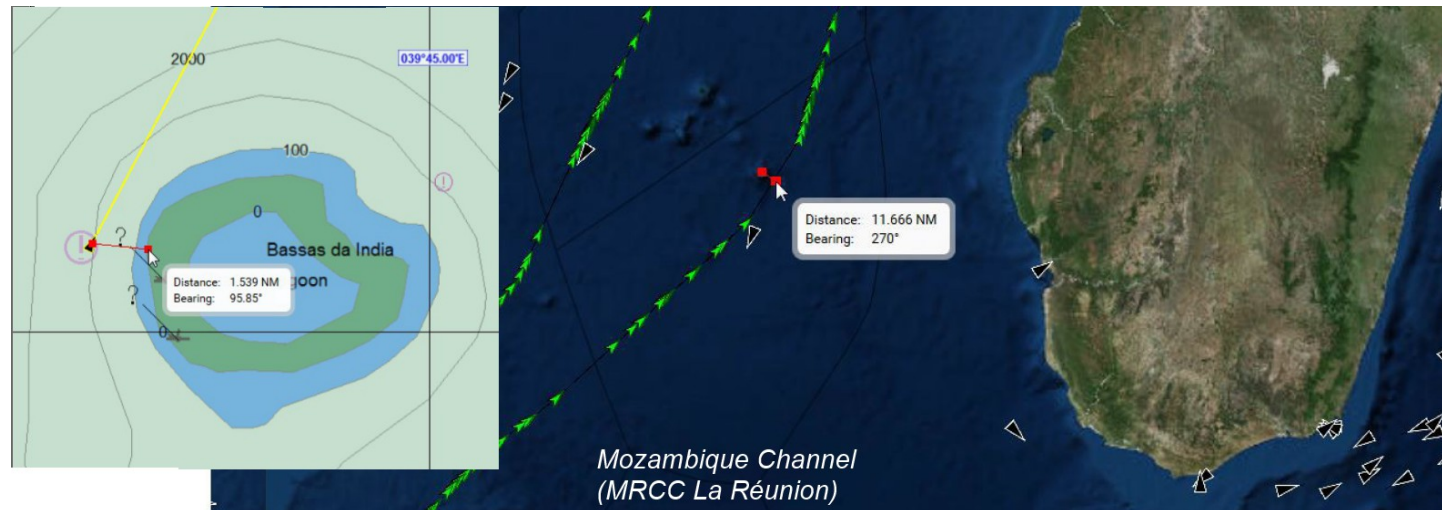

Governance

- Action conducted under the auspices of the Prime minister's office.
- Definition of a national strategy for deciding on the needed future directions for IMDATE (new data and services).
- Constitution of a community of users coordinated by a dedicated entity of the Directorate for maritime affairs.
 - Assistance and training sessions.
 - Collecting of bugs or requests of improvement made by users. Selection during inter-administrations sessions held in June and January. Submission to EMSA.

Main feedbacks

- Great benefit in having S-AIS positions in open-sea areas for monitoring the ships and their distance to shore in case of no AtoN.

- Improve the readability of charts (too much information displayed not allowing to spot the interesting one).
- Improve the performances of the system (time of response, increase the size of the search area, of the results).
- Need to access to vessel history.

Thank you...
