Introduction to EMSA's At-sea Oil Recovery Service

Background

Establishment and tasks

- Post Erika (2002: EMSA established)
- Post Prestige (2004: new task Marine Pollution Preparedness & Response)

Decentralised Agency of the European Union

- Own legal identity
- No legislative role
- Technical and operational support
- 200+ employees
- 85 MEUR annual budget (2021)

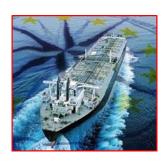

Legal basis

Regulation 1406/2002 as amended (2013 – a new task related to offshore installations' spills)

Fields of competence

Maritime safety

Prevention of pollution caused by ships

EMSA

EMSA's objectives

Maritime security

Response to pollution caused by ships

Response to pollution caused by oil and gas installations

EMSA's Pollution Response Services

- Network of Stand-by Oil Spill Response Vessels – mechanical recovery and dispersant spraying capabilities
- Equipment Assistance Service (EAS) equipment to be used by vessels of opportunity
- CleanSeaNet and RPAS
- ➤ HNS Operational Support: MAR-ICE Network
- Experts: On-site/Office-based

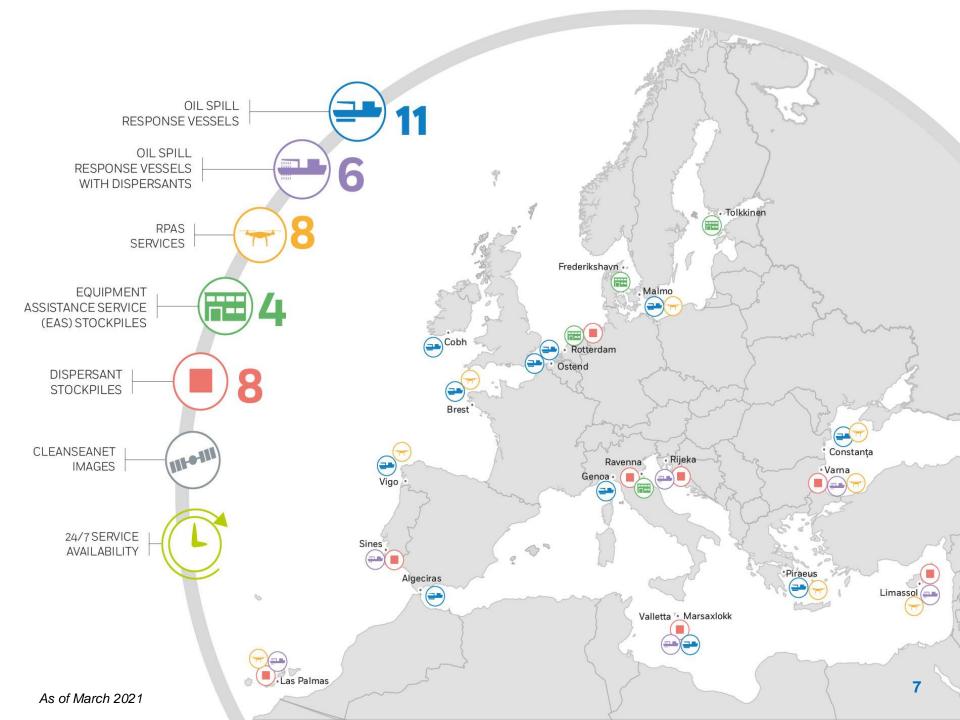

Framework for Service Network of Stand-by Oil Spill Response Vessels

- "Top-up" Member States pollution response capabilities
- "European Tier" of resources
- Mobilisation by EMSA at request of MS/EFTA//Third country sharing a regional basin or Commission (or Private Entity under certain conditions)
- Channelled through "EU Community Mechanism"
- Emergency Response Coordination Centre (ERCC) managed by DG ECHO
- Under "operational control" of the affected coastal State

Main Objective: Stand-by At-sea Oil Recovery Service

Contractor must ensure that:

- Vessel undertakes normal commercial activities; and
- At request, the vessel is transformed & mobilised at short notice for at-sea oil recovery services

Simplified mobilisation procedure

Request for assistance is sent to EMSA

Requesting Party decides which vessel to mobilise

The Requesting party and vessel contractor sign the IRC

The vessel stops commercial operations, loads the OSR equipment and mobilises the vessel within 24 hours

The vessel is ready for response operation under the command of the Requesting Party

Type of Vessels

Offshore supply vessels

Dredgers

Type of Equipment

Tankers - Advantages

- Large storage capacity (EMSA largest is 7,458 m³)
- Prepared to deal with oil (heating, filling, discharging)
- Flexibility for decanting
- Flashpoint
- Unrestricted sea-going service

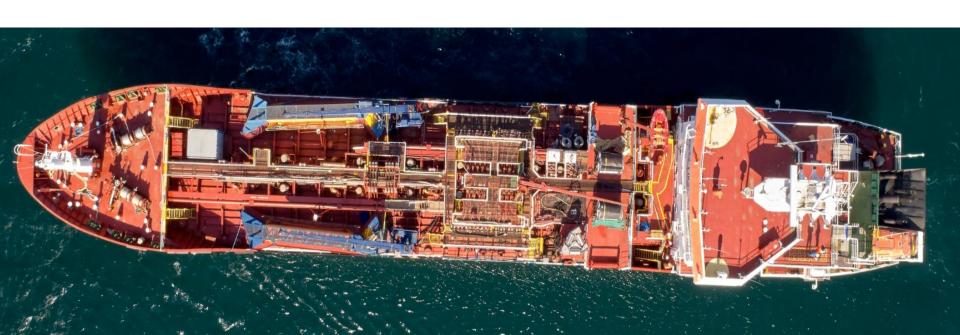

Tankers - Disadvantages

- Space on deck
- Low speed
- Manoeuvrability
- Crew number
- Accommodation

Offshore Supply Vessels - Advantages

- Deck Space
- Equipment Deployment
- Less pre-fitting for installing equipment
- Manoeuvrability and Low Speed
- Visibility
- Accommodation for EMSA and liaison officer

Offshore Supply Vessels - Disadvantages

- Limited storage capacity
- Bad weather swell washes the aft with oil (slippery)
- Dirty equipment oil spreads quickly
- Flashpoint
- Significant pre-fitting (e.g. piping and heating)

Setting-up the Service

Preparatory Phase

- Purchase/transfer/servicing of oil spill response equipment
- Pre-fitting the vessel for equipment installation
- Crew Training

Stand-by Phase

- Vessel available and ready to respond within mobilisation time (max. 24h.)
- Equipment maintenance
- Drills and Exercises

Preparatory Phase: Challenges

- Pre-fitting, conversion works
- Purchase/transfer/servicing and installation of OPR equipment
- Mobilisation Plan, Operational Procedures
- Crew Training
- Certification by Classification Society (Class Notation as "Occasional oil recovery vessel60°C")
- Acceptance Test

Stand-by Phase: Drills

Quarterly drills: 4 times a year

Scope:

- To verify the level of readiness of vessels, crew and OSR equipment
- To train crew in oil pollution response: equipment operation with other units at sea

Stand-by Phase: Exercises

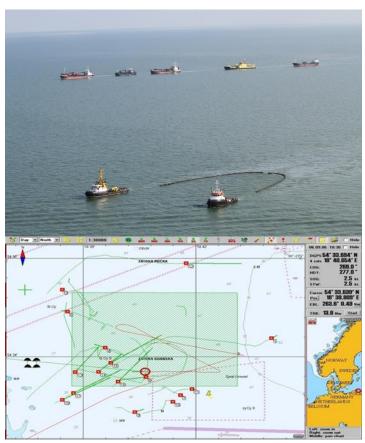

Type:

- Notification only
- Operational (max. 10 days/year)

Scope:

- Integration of EMSA vessels in EU Member States Command and Control Structures
- Co-operation with participating Units
- Internal and External level of Coordination

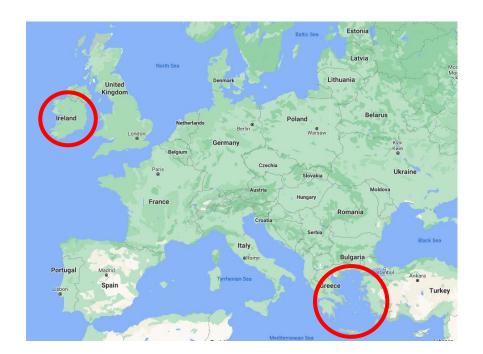

Scope of procurement

Areas of operation

	Area of operation				
1. Aegean Sea	Aegean Sea as defined by the International Hydrographical Organisation including the islands of Crete and Rhodes				
2. Atlantic North	Covering the coastline of Republic of Ireland				

Areas of operation (2)

However, if needed and technically appropriate, they will assist elsewhere as well. Given logistical and technical considerations, these other areas would probably be adjacent.

Within the agreed mobilisation time (max.24 hours) the EMSA contracted vessel(s) must fulfil the following conditions:

- be inside the area of operation, and
- be able to send a "Notice of readiness" to the Requesting Party meaning equipped with the pollution response equipment, providing the contracted storage capacity and with the necessary crew for performing oil recovery services.

In addition, the EMSA oil pollution response equipment must be stored, maintained and insured either on board the vessel(s) or in a stockpile located on the coastline of an EU Member State.

Min. requirements regarding the arrangement and the vessel (Phase II)

- a) Vessel should not be engaged with to provide pollution response services at the time of award;
- b) An authorisation from the shipowner/charterer for the use of the vessel for the purpose of the EMSA services during the contract duration must be provided;
- c) The minimum vessel net storage capacity for recovered oil must be for both lots: 1,500 m³:
- d) Vessel(s) must be available for mobilisation at short notice;
- e) Vessel(s) should be self-propelled;
- f) Vessel(s) should not be subject to the single hull phase-out requirements;
- g) Vessel(s) should be registered on either an EU Member State or a contracting party to European Free Trade Area (EFTA) or a non-EU white listed register as defined by the Paris MoU;
- h) Vessel(s) must be classified by an EU recognised organization;
- i) Vessel(s) for Lot 1 (Aegean Sea) must be classed for, at least, international voyages in the Mediterranean and Black Sea. Vessel(s) for Lot 2 (Atlantic North) must be classed for unrestricted sea-going service and have all the certificates required for international voyages without any limitation;
- j) In case the vessel is not built it must be under construction by 15th September 2021 and finalised before the end of the Preparation Phase;
- k) Vessel's should have a valid Safety Management Certificate (SMC);
- I) The contact person of the company/consortium and the responsible crew on the vessel(s) must have a good command of the English language.

Equipment solution: Lot 1 – Aegean Sea

Set of equipment transferred

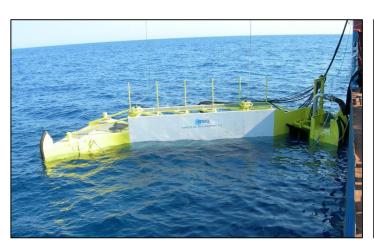

- 1. Sweeping arms, Koseq, 15m*
- 2. High-capacity skimmer, Normar*
- 3. Boom Vikoma Hi-Sprint (2x250m)
- 4. Sampling mini lab
- 5. Flashpoint Tester
- 6. Communication equipment

Purchase

- 1. Oil slick detection system
- 2. Flow meter
- 3. Interface Detection System
- 4. Gas detector
- 5. VHFs
- 6. Cleaning machines
- 7. Equipment logo

^{*} The transferred equipment will need to be overhauled

Equipment solution: Lot 2 – Atlantic North

Set of equipment transferred

- 1. High-capacity skimmer, Lamor
- 2. Cleaning machines*
- 3. Flow meter*

Purchase

- 1. Rigid Sweeping arms
- 2. Boom system
- 3. Adjustments to the power pack
- 4. Oil slick detection system
- 5. VHFs
- 6. Gas detector
- 7. Interface Detection System
- 8. Sampling mini-lab
- 9. Equipment logo

^{*} The transferred equipment will need to be serviced

Budget

	Max. Availability Fee	Max. Equipment Price	Max. Pre-fitting Price	Max. Overall budget	Indicative indexed Availability Fee	Total max. budget for both initial
Lot	(initial stand- by period)				(for additional 4-year stand-by period)	and additional contracts
1. Aegean Sea	€2,400,000	€500,000	€500,000	€3,400,000	2,544,000	€5,944,000
2. Atlantic North	€2,400,000	€1,600,000	€500,000	€4,500,000	2,544,000	€7,044,000

27

Financial Elements

Preparatory Phase - Pre-financing available from EMSA

- 1) Oil Spill Response Equipment
 - Purchasing Pre-financing up to 100%
- 2) <u>Pre-fitting Vessel</u> (e.g. for equipment installation)
 - Pre-financing up to 80%
 - Remaining 20% paid when vessel is accepted by EMSA

Stand-by phase

3) Vessel Availability Fee (covers drills; crew training; storage, maintenance and insurance of equipment)

Additional Payments

- 4) At-sea Exercises: Daily rate + Fuel
- 5) Pollution Response Incident by Member State: Daily rates (operational and stand-by) + Fuel + Cleaning

Dual Contract Structure

Incident Response Contract

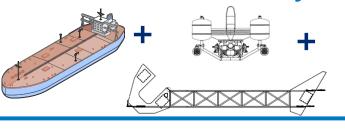

At-sea Oil Recovery Service

Vessel Availability Contract (VAC)

Between EMSA and the Contractor

4 Years + Renewable once = Maximum 8 years total

Vessel Availability Contract

It secures:

- Requirements for vessel(s), equipment and crew
- Stand-by / availability
- Drills and participation in exercises
- Mobilisation time
- Mandatory use of the Incident Response Contract

Incident Response Contract (IRC)

Pre-fixed contract with pre-set conditions & tariffs:

- Between the requesting coastal State and contractor
- Avoid unnecessary high tariffs vs. vessel of opportunity
- 1 Model Contract for 25+ different legal systems

IRC: Some key provisions

Clear allocation of responsibilities during operation

- Under operational command of the MS (SOSC)
- National (liaison) officer on board
- Safety responsibility: Master (final)

Period

30 days: "window of opportunity"/economic commitments of operator

Renewal possible under same conditions

How to apply

Competent procedure with negotiations

2 Phase Approach:

Phase I - "Request to participate"

Phase II – (Restricted) "Invitation to Tender"

Phase I: Request to participate

Publication of Request to participate in the OJEU on 9 March (Open to any Interested Party)

Submission of Request: Deadline 9 April

Evaluation of requests as per Enclosure R.1: Criteria

Determination of Pre-Selected Candidates

Phase II: Invitation to Tender

Invitation to Tender (restricted): Pre-Selected Candidates

Submission of Bids

Improvement to Bids: Best Quality/Price Ratio

Submission of Final Bids

Evaluation of Bids: Info provided in the Tender Specifications

Award of Contracts

Provisional Timetable Request Phase

"Request" Evaluation

PROCUREMENT PHASE 1: Request to participate "Contract Notice" 9 March Documents available on www.emsa.europa.eu publication in OJEU Procurement Procedure and **Information Meeting** 19 March **Technical Elements** "Request" Deadline "Light" documentation submission 9 April Identification of "Pre-selected Candidates" by

Zip file documents

Phase I – Request to participate documents

Request to participate (RtP)

Invitation letter:

- Encrypted email to be sent to <u>CPNEG22021@emsa.europa.eu</u> by 16.00h Lisbon time on 9 April 2021
- Maximum size per email 12 MB
- Encryption password to be sent to the same email address within 24 hours (<u>only after</u>
 16.01h Lisbon time on 9 April 2021 and until 15.59h Lisbon time on 10 April)
- Justification for non-inclusion of requested documentation
- Requests can be in any official language of the EU (preferably in English)
- Point 11.5: General Description of Proposed Arrangement: must include copy in English
- Separation of documentation into <u>Parts A E</u> (as per the Checklist)

Enclosures:

- 1: R.1 Request Specifications: main requirements;
- 2: R.2 Check-List: review it before sending the Request to participate;
- 3: R.3 Template for "Statement of Subcontracting/Joint Offer".

Eligible candidates

Economic operators established in:

- the Member States of the European Union
- Albania, Republic of North Macedonia, Iceland, Liechtenstein, Montenegro, Norway, Serbia and Bosnia and Herzegovina

Request to participate criteria

- a) Exclusion Criteria Satisfactory / Non-satisfactory
- b) Selection Criteria Satisfactory / Non-satisfactory

NON-COMPLIANCE WITH 1 EXCLUSION OR SELECTION CRITERION – GROUND FOR NON - ADMISSION

a) Exclusion criteria (points 11.2 and 11.6 of Request Specifications)

> <u>Declaration on Honour</u> duly filled and signed

and

additional evidence:

- Copies of extracts of judicial records/certificates issued by national authorities
- Where any document described above is not issued in the country concerned, it
 may be replaced by a sworn statement made before a judicial authority or notary or
 a solemn statement made before an administrative authority or a qualified
 professional body in its country of establishment

b) Selection criteria (point 11.3 of Request Specifications)

Economic and Financial Capacity

- Balance sheets for the last3 years
- FOR PRIVATE ENTITY:
 Statement of overall
 turnover and profit and loss
 account for the last 3
 financial years
- FOR PUBLIC ENTITY: annual budget of the last year

b) Selection criteria (point 11.4 of Request Specifications)

Technical and professional capacity of the Company/Consortium

- Document of Compliance (DoC) for International Safety
 Management (ISM) Code including the related latest external audit report
 Grouping: at least 1 member must have a valid DOC
- Overview of company/consortium Port State Control record (PSC inspections and detentions) or annual Flag Surveys for last 3 years – 3 detentions will be ground for exclusion

Checklist

ENCLOSURE R.2 - CANDIDATE'S CHECKLIST

Procurement procedure: EMSA/CPNEG/2/2021

Title: Service contract for stand-by oil spill recovery vessels

Phase I - Request to participate

In order to submit an offer in this Procurement Procedure the tenderer has to complete and submit all documents listed below:

Document	Check
Request submitted by email before 16:00 hrs Lisbon time on 69/04/2021	
Ref. EMSA documentation: invitation to autimit a Request to participate, point 2 Encrypted (password protected) request duly signed by the authorised representative, acanned and submitted	
by e-mail to the following address: CPNEG22021@emsa.europa.eu	
NB: The size of the e-mail may not exceed 12 Mb per one email	
Ref. EMSA documentation: Invitation to aubmit a request to participate point 3 and follow the instructions in Appendix I Submission of Encrypted Tenders by E-Mail	
Request must include a copy in English of the documents/information requested under point 11.5 of the Request Specifications - General description of the proposed arrangement.	п
Ref. EMSA documentation: Request Specifications, point 9	_
Request structured in line with EMSA requirements – Parts A, B, C, D and E	П
Ref. EMSA documentation: Request Specifications, point 9	_
PART A	
Signed cover letter clearly indicating:	
For individual company:	
- the company applying	_
- the person heading the project	ы
For subcontractors and groupings:	
 the subcontractors and companies forming the grouping (including roles, qualifications and experience of each company) 	
- the company and person heading the project	
(Nef. EMSA documentation: Request Specifications, point 9)	

Document	Check
PART A 2. Statement of Subcontracting/Joint Offer (template - Enclosure R.3 to the Request to participate) In case of Joint Offer or Subcontracting, please fill the form Net. EMSA documentation: Request Specifications, points 6, 9 and 10	_
PART A 3. Authorizing document For individual company: Original of the document authorizing the person heading the project to submit an offer and, in case of award, to sign the contract on behalf of the company For proprieties: Original of the document authorizing the company and person heading the project to submit an offer and, in case of award, to sign the contract on behalf of the grouping Met. EMSA documentation: Mequest Specifications, point 9	0
PART A 4. Legal Entity Form (this docurrent is available on the Procurement Section (Legal Entity Form) of EMSA's website http://demai.gurous.eu/teark/procurement/selfs.htms) Candidates are exempt from submitting the Legal Entity Form requested and attachments if such a form has already been completed and sent either to EMSA or any EU Institution previously unless changes have occurred in the meantime. In case of grouping, each company must submit this document. Pief. EMSA documentation: Request Specifications, points 9 and 11.1	_
Supporting documents: - copies of company VAT number registration certificates and, if applicable; - a copy of an Official Document (Official Gazette, Company Register, etc.).	0
PART A 5. Financial Identification Form (this document is available on the Procurement Section (Financial Identification Form) of EMSA's website http://emsa.surcos.su/coorument.html) For the Company leading and submitting the Request only. This document must be filled and signed by the account holder and the bank (or accompanied by a recent bank statement). Net. EMSA documentation: Request Specifications, point 9	0

Request Evaluation

Evaluation Result

Request meeting exclusion and selection criteria?

Yes → "Pre-selected Candidate" → Invitation to Tender (expected mid-June)

No → "End of Participation"

Provisional Timetable Phase II - Tender

PROCUREMENT PHASE 2: Invitation to Tender				
"Invitation to Tender"	"Invitation to Tender" sent "Pre-selected Candidates"	mid-June		
Visit to EMSA stockpiles	Opportunity to review equipment for transfer, if possible	Week 26		
Clarification meetings	Clarification with tenderers	Week 27		
"Tender" Deadline	"Heavier" documentation submission	Beginning August		

Provisional Timetable Phase II - Tender

PROCUREMENT PHASE 2: Negotiation				
Negotiation Stage	Improvements to offers	August/ September		
On-site Meetings	Visits to vessels	August		
"Final Tender" Deadline	Final offers	mid- September		
Final Tender Evaluation	Awarding of contracts	October/ November		

To be prepared for the Phase II - Tender

- Technical Specifications of the vessel
- Pollution Response Equipment
- Mobilisation Plan
- Crew training
- Environmental performance
- Financial Offer

Will be evaluated in the Tender Phase Against minimum requirements and award criteria

Relevant Legislation

Regulation (EU) 2016/1625

Regulation (EC) No 1406/2002 (consolidated version)

EMSA has established a network of stand-by oil spill response vessels through contracts with commercial vessel operators. EMSA's contracted vessels have been specifically adapted for oil spill response operations and are on stand-by, carrying out their usual commercial activities.
