

## 4<sup>th</sup> CSG meeting, 9 June 2020

### CISE website updates (information paper)

#### Aim

The purpose of this document is to inform CSG members about recent updates of the CISE website and to encourage members to consult the website for any news during the Transitional Phase. The information is conveyed through this paper instead of a presentation during the meeting, given the limited time and VTC format.

#### Background

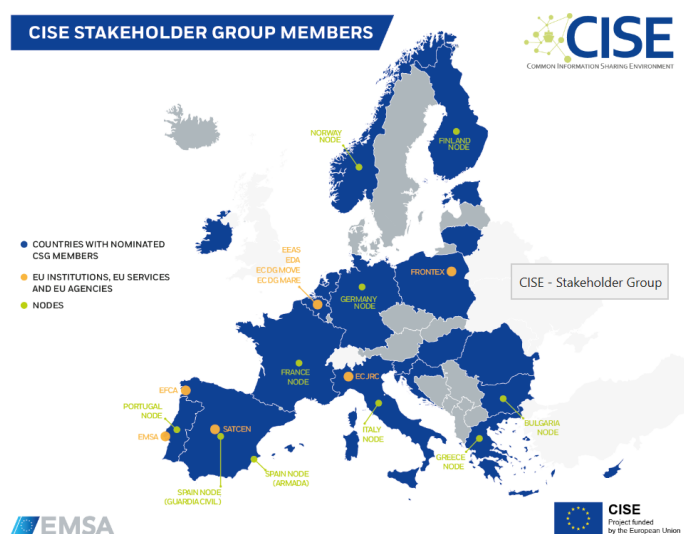

The CISE website <http://www.emsa.europa.eu/cise.html> is the main tool to share information about the Transitional Phase and to disseminate communication and visibility material. It provides a basic overview of the project (objectives, duration, budget, implementation plan, relevant contact details, etc.), relevant news and useful related material (incl. meeting documents and reports, pdf versions of printed material etc.).

#### Recent updates

After the 3<sup>rd</sup> CSG meeting in February 2020, the following updates have been done.

On the entry page of the CISE website, a PDF version of the **CISE Leaflet** has been published.

In the “**Stakeholders**” section, information about the working groups has been amended as additional groups were created. Furthermore, following what was agreed by the CSG, the file “**CSG member authorities**” has been published and provides information about the authorities involved in the CSG and links to their respective websites. In addition, a “**CISE map**” infographic demonstrates both the involvement of states and EU agencies or services in the CSG, and the ownership and geographic location of the current CISE nodes.

Following the request of the CSG at its 3<sup>rd</sup> meeting, EMSA contacted a number of other CISE related projects and offered to publish some basic information and links on the CISE website, in order to share information and make good use of different initiatives for CISE. As a result, the section “**Related links**” has been enriched with this information and can be further updated as other projects provide their information.

During the 1<sup>st</sup> CISE Best Practices Workshop, participants discussed the added value of CISE and agreed on a number of key features that should be emphasized when promoting CISE. It was suggested to create a FAQ (Frequently Asked Questions) based on these conclusions and to publish it on the CISE web site. Accordingly, a first set of 11 FAQ’s have been published on the CISE website under a new **FAQ** section. The questions cover all key topics identified during the BPW, topped up with other questions often asked about CISE. Further questions can be added as the need arises.

The “**News & Activities**” section is continuously updated and is where to go to find the latest information about upcoming events, meeting outcomes or other news related to the Transitional Phase.

#### CISE Transitional Phase contributed to the joint EMSA-ECGFF workshop in Lisbon

Published 17.02.2020

The current French Chairmanship of the European Coast Guard Functions Forum (ECGFF) organised together with EMSA a joint workshop on “Information sharing and data security in the maritime safety and security domains”, hosted by EMSA on 11-12 February 2020. The general objective of the workshop was to share best practices among the various relevant national and regional stakeholders, stimulate ref ...

*Social media*

The section “**Meetings and workshops**” is where all documents and reports from the CSG meetings are published (and if considered interesting for external parties, also documents from other meetings or workshops).

**Social media** is used to share CISE related news to a wider audience. Members are encouraged to follow EMSA’s accounts on Twitter, LinkedIn and Facebook and to help share the posts.

## Way forward

CSG members are invited to take note of the information.
