

1st SSN LRIT Group Meeting

SSN version 4 – Commissioning Test Process

Agenda item 1.4.2

Diego Molero / Project Officer
Department C: Operations/Unit C.2.1

Lisbon / 17 May 2017

Findings

The Commissioning Test process

- checks only the interface between the MS national SSN system and the central SSN
- but not the capability of the MS to exchange operational data

First Phase

Successful completion of the commissioning test plan

Second Phase

- EMSA to validate the national SSN system
- actual production data is ingested by the MS in its Test environment
- production data will be converted to be compliant with the version under validation
- No MS Authority/Agent involved: data conversion at the National Central system level connecting with EMSA SSN Central system
- SSN security and data protection requirements: environment is not available to external users

Member States are invited to

- Agree on the new Commissioning Tests methodology
- Agree to amend:
 - ✓ MS Commissioning Test plan
 - ✓ Commissioning test plan and SSN-HDK-002 document
 - ✓ Welcome on Board
