APPROVAL FOR USE

The dispersant is approved for use in the following European states: Belgium, Croatia, Cyprus, France, Ireland, Malta, Netherlands, Portugal, Spain and United Kingdom.

DIRECTIONS FOR USE

Radiagreen OSD can be used pure, undiluted, in a 1 on 20 proportions (1 part dispersant for 20 parts of oil) for dispersion by means of aircraft or vessel.

Appropriate spraying equipment is advisable such that the product is uniformly distributed on the surface of the spill. An additional mechanical mixing may be advisable to enhance the breaking.

Always make sure the dispersant is sprayed on top of the spill. Give the dispersant some time (30-40 minutes) to penetrate the oil. Then spread the treated spill using a mechanical device or a water jet (this might not be necessary in open sea).
