12th LRIT NCA Meeting

Agenda Item 12.3.1 –Outcome from the MSC 95

Diego Molero / Project Officer
Department C, Operations/Unit C.2.2

Lisbon / 14 October 2015

EMSA
European Maritime Safety Agency

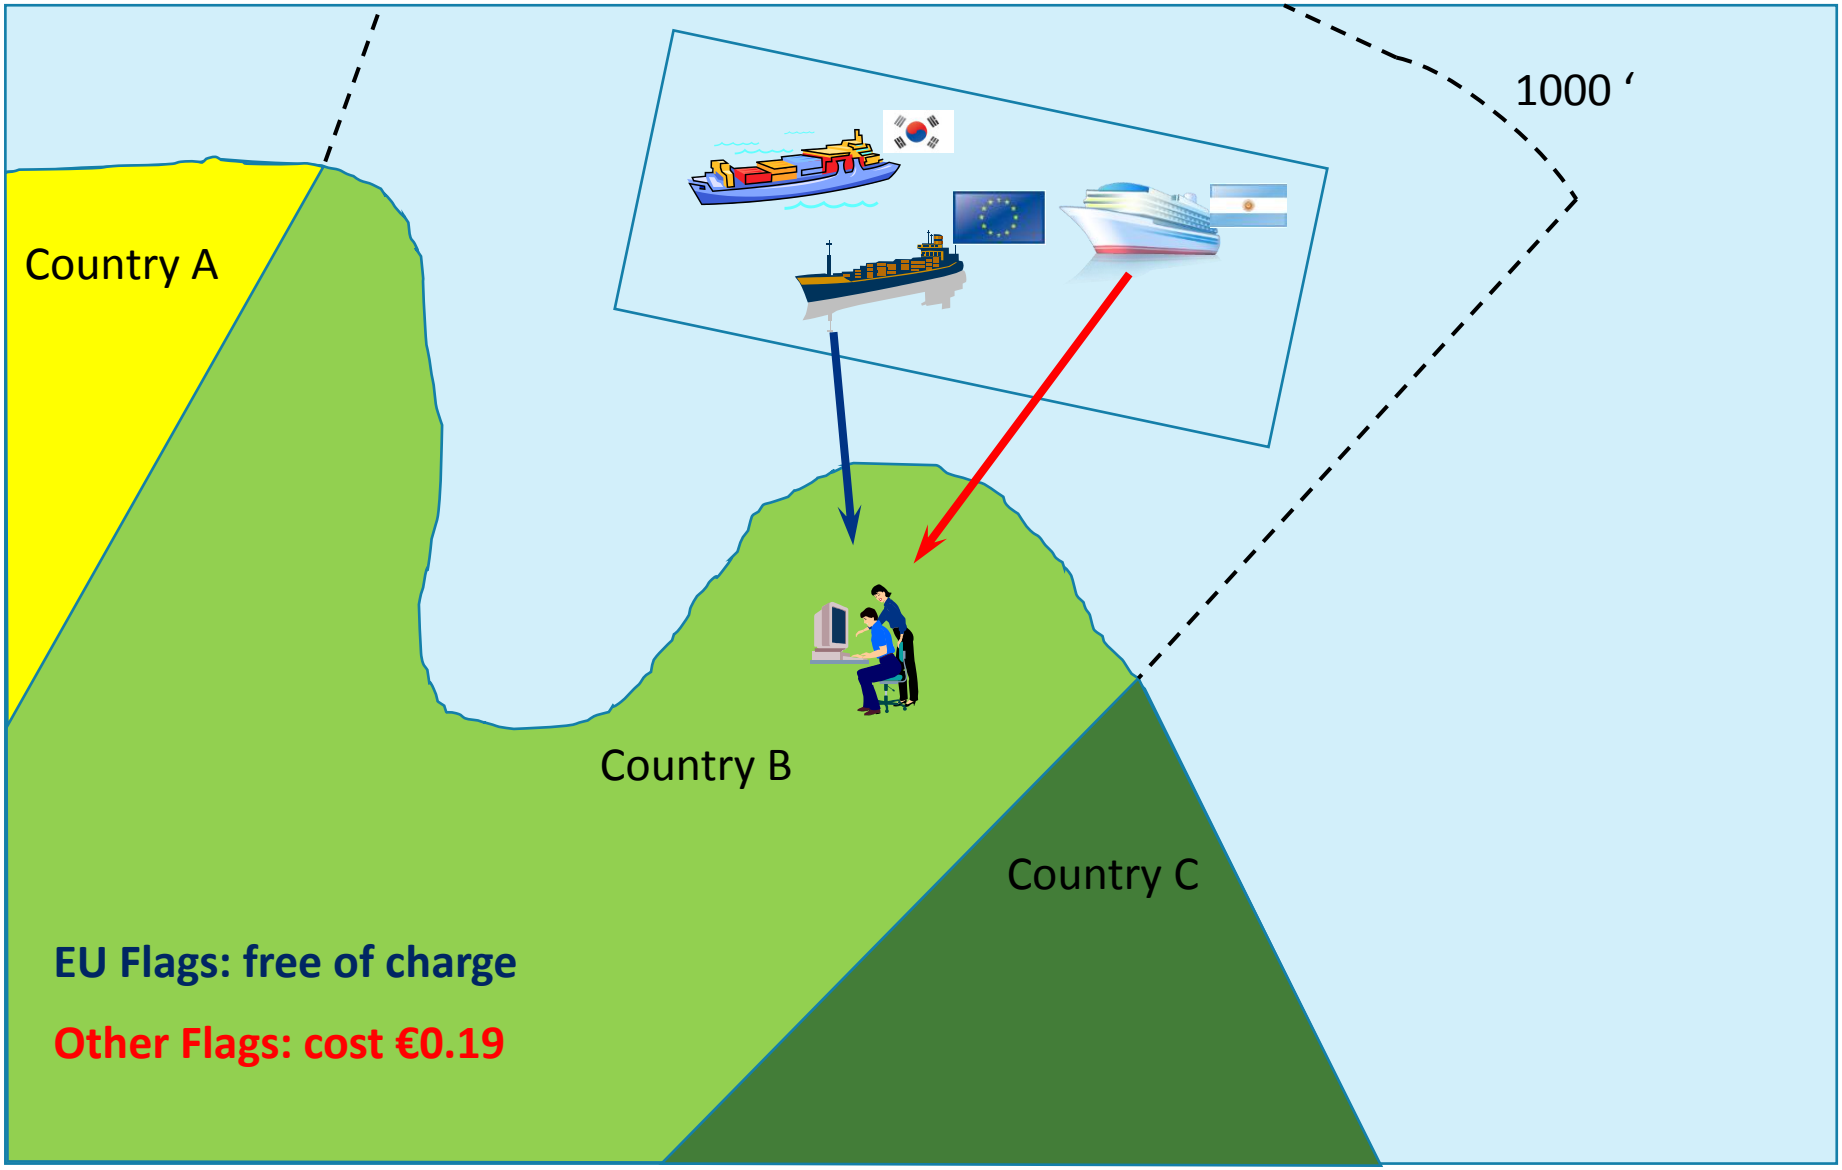
BACKGROUND

- Amendments to MSC.1/Circ.1259 and MSC.1/Circ.1294
- LRIT OGB prepared detailed procedures for the second modification testing phase
- A pre-modification testing will be conducted
- The current TEST environment will be provided with a third external connection
  - Current DEVTEST environment availability assured during the implementation

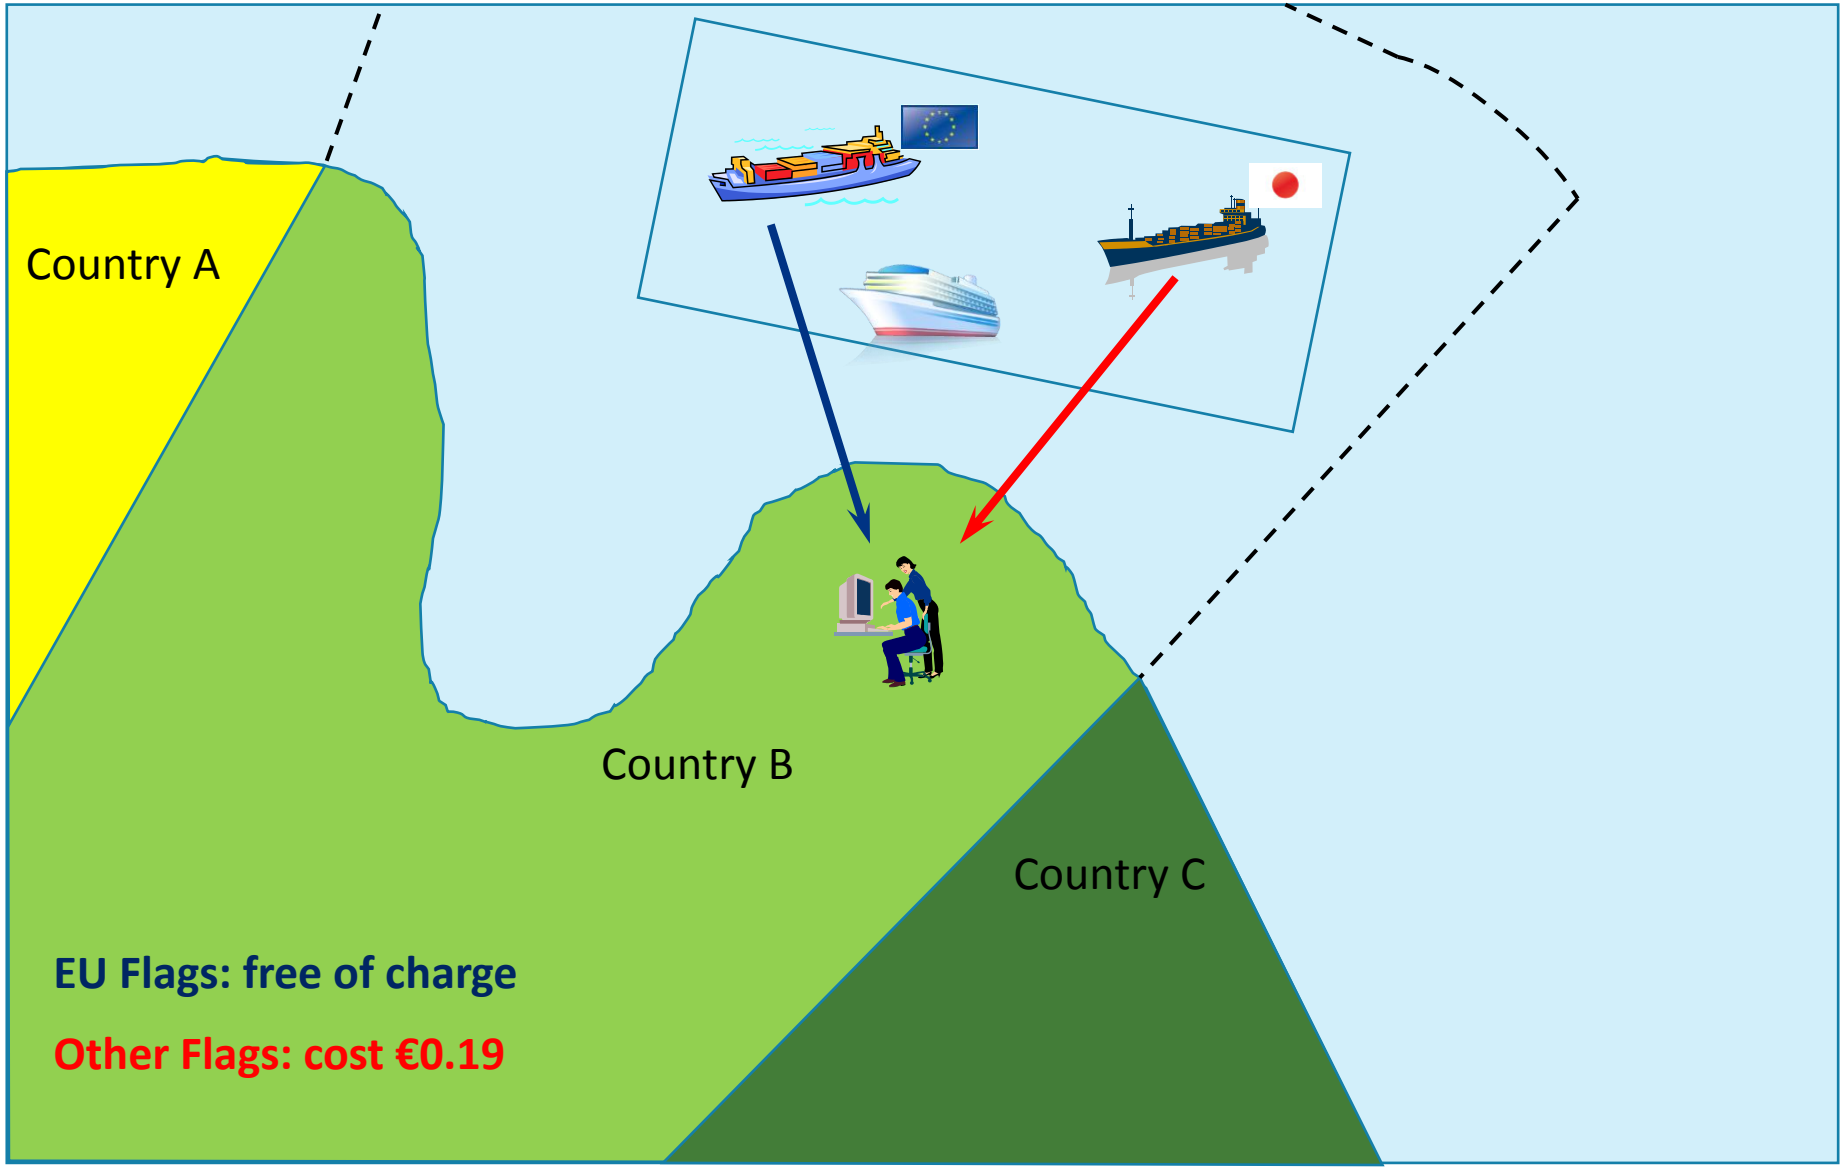
SUMMARY OF CHANGES

- Include additional info into Receipt Messages with Receipt Code 5 (ship not responding)
- Processing custom coastal areas and coastal State standing orders from DCs
- Use of coastal State standing orders to request LRIT information based on flag and type of ship
- Use of the existing SAR SURPIC request message for coastal State requests

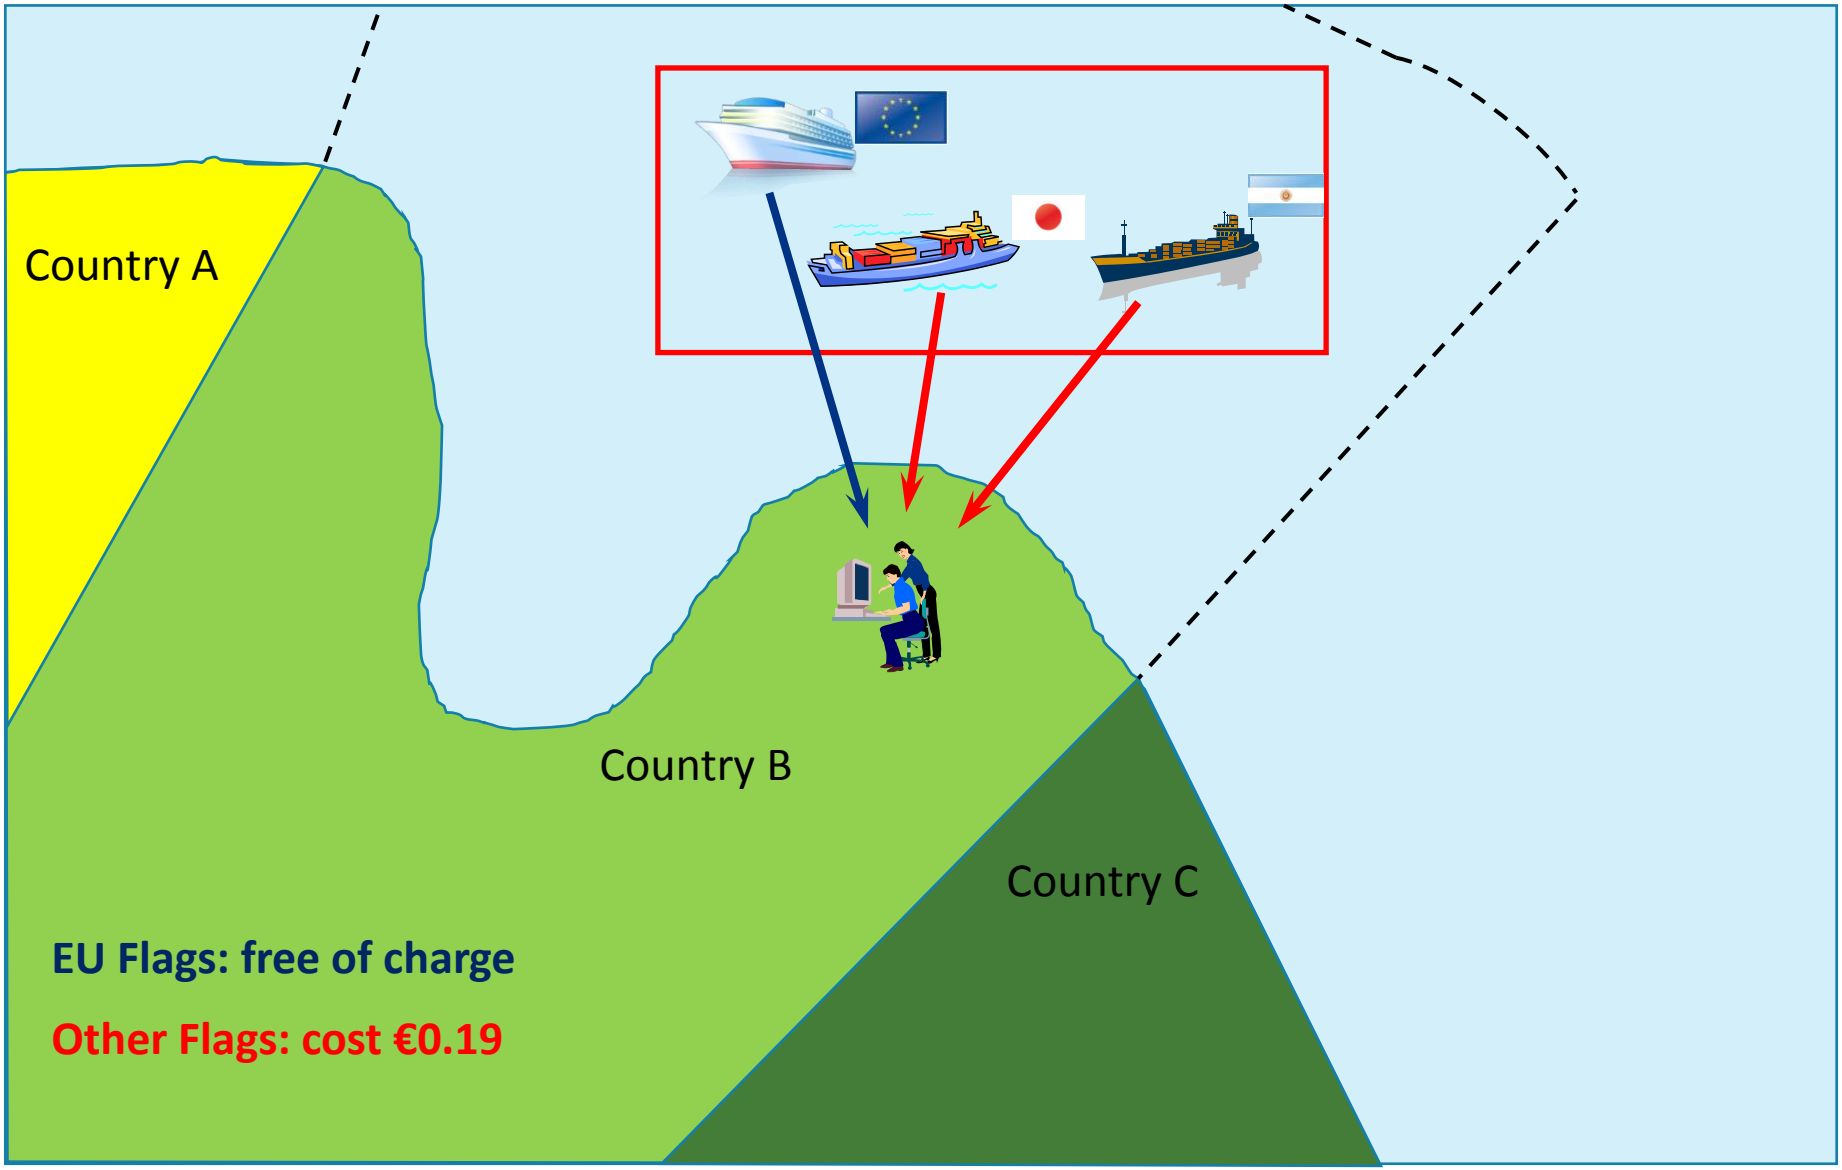
FILTER BY FLAG



FILTER BY SHIP TYPE



COASTAL SURPIC



IMPLEMENTATION PLAN

- Implementation plan in two phases:
  - First phase implementing the ship type requirement in the EU LRIT CDC and EU LRIT Ship DB, plus speed and heading (ASP)
  - Second phase new versions of the LRIT IDE and EU LRIT CDC would be developed
- Pre-modification testing will be carried out by the DDP Server, LRIT IDE, and two assisting DCs
- Report to NCSR 3: 29th Feb to 4th March 2016
