

7th SSN/LRIT Group Meeting

Quality of LRIT data

Agenda item 7.4.5

Vincent Guida / Senior Project Officer
Department 3: Unit 3.3 Simplification

Lisbon / 13 May 2020

- **IMSO noticed that around 1/3 of EU CDC ships were coded as ship type “Other”**
- **IMSO insisted that this category should be used only if ships cannot be classified in the types: passenger ship, cargo ship and tanker (as per MSC.1/Circ.1259)**
- **Random check done by IMSO showed that 57% of those “Other” were cargo ships**

Updates in EU LRIT Ship DB

- During ASP campaign in January 2020: out of 850 ships not reporting, 18% needed an update (terminal was replaced, deactivated, or invalid radio ID)
- LRIT Ship DB managers are invited to carefully check and update data about :
 - Ship type : Other
 - Terminals which are reported as not updated/replaced (see Cause of failure, in menu Ship management)
