This could easily be done via Skype for Business and Teams. To share information remotely and work collaboratively between users is amongst the common features of Teams and Skype for Business platforms due to their smooth integration with Office suite documents and the capacity to organize large meetings (up to 250 participants). With MS Teams and Skype for Business one can organise meetings combining video, audio, sharing features and special functions for the host. Participants can join via: PC, tablet, phone, or video conferencing system H.323.

Processing by EMSA

Providing authentication and authorization using EMSA Active Directory

Both tools are integrated with EMSA AD (Active Directory) and the authentication and authorization for using the tools is performed through it. This means the users need to be already registered at EMSA with name, last name and email address to enter EMSA environment/workspaces.

For external users that are not registered in EMSA AD joining meetings following links, not personal data processing is performed by EMSA.
