EMSA DIRECTOR APPEARS BEFORE EU PARLIAMENT COMMITTEE TO SUPPORT CISE NETWORK

The EMSA Director made his appearance before the EU Parliament’s Committee on Transport and Tourism on 18 November to present information about the implementation of the CISE network for the first time. The presentation highlighted the key role of the CISE network in providing safety and security enhancements for maritime transportation and a recent series of meetings held in the context of the negotiations with the European Parliament on the future of the maritime safety and security service. The Director also highlighted the importance of the CISE network in ensuring the safe and secure operation of ships and the protection of the marine environment.

CELEBRATING THE CISE NETWORK AT THE 59TH EMSA ADMINISTRATIVE BOARD MEETING

The EMSA Administrative Board held its 59th meeting on 11-12 November, gathering 41 participants from 24 member states via videoconference. The Board reviewed the progress made during this period, depending on the transitional phase that was expected to extend until October 2023. It was further invited to apply for a second grant for a coherent evolution of the CISE network and to achieve an efficient guidance of the CISE technical groups. The Board also discussed the overall working organisation and the governance of the CISE network and the development of a comprehensive strategy for the CISE network.

The Board also reviewed the progress made in the CISE data and service models. Following the implementation of their coast guard duties, concrete examples of the significant work on the CISE data and service models was presented, including the development of a Satellite AIS capacity at national or public national administration with a programme or interest to extend operational capacities. The Board also discussed the implementation of the CISE network and the development of a Satellite AIS capacity at national or public national administration with a programme or interest to extend operational capacities.

INTERACTIVE EMSA-EEA WORKSHOP CALLS ON PARTICIPANTS TO SHARE VIEWS ON FIRST REPORT OF ENVIRONMENTAL PERFORMANCE OF MARITIME TRANSPORT

On 4-5 November gathering together over 130 participants from maritime and environmental authorities, the workshop was hosted by the EMSA-EEA partnership to exchange views on the implementation of the first report of the European Maritime Agency (EMSA) on the environmental performance of maritime transport. The workshop was an opportunity to discuss the main findings of the report and to share views on the implementation of the reports recommendations. The participants were encouraged to provide comments and feedback on the report and to share their experiences and best practices.
