**VIRTUAL USER WORKSHOP HELD ON**

**31 May 2021**

EMSA would like to thank all the users, including the European Commission, member states, Notified Bodies, manufacturers and other stakeholders for their support and input in developing EMSA's e-tag application. The portal gives interested users access to the IMO database of ships, including IMO number and flag, vessel identification number, type and tonnage. The portal also provides information on ship calls, voyages and port calls. 

**UP AND RUNNING FOR ONE FULL YEAR**

**FIRST REGIONAL WORKSHOP ON CISE**

EMSA is pleased to celebrate the first anniversary of the new implementation of the e-tag on a voluntary basis. Notified Bodies to report and upload product information are meant to be operated by smaller vessels of opportunity, thus improving cost efficiency at the same time. It was concluded that to reach its full potential, CISE should be recognised and accepted by the EU. The concept of maritime CISE started in 2009 with the aim of ensuring increased cross-sectoral and cross-border exchange of information.
