Sessions

Exchange of experience

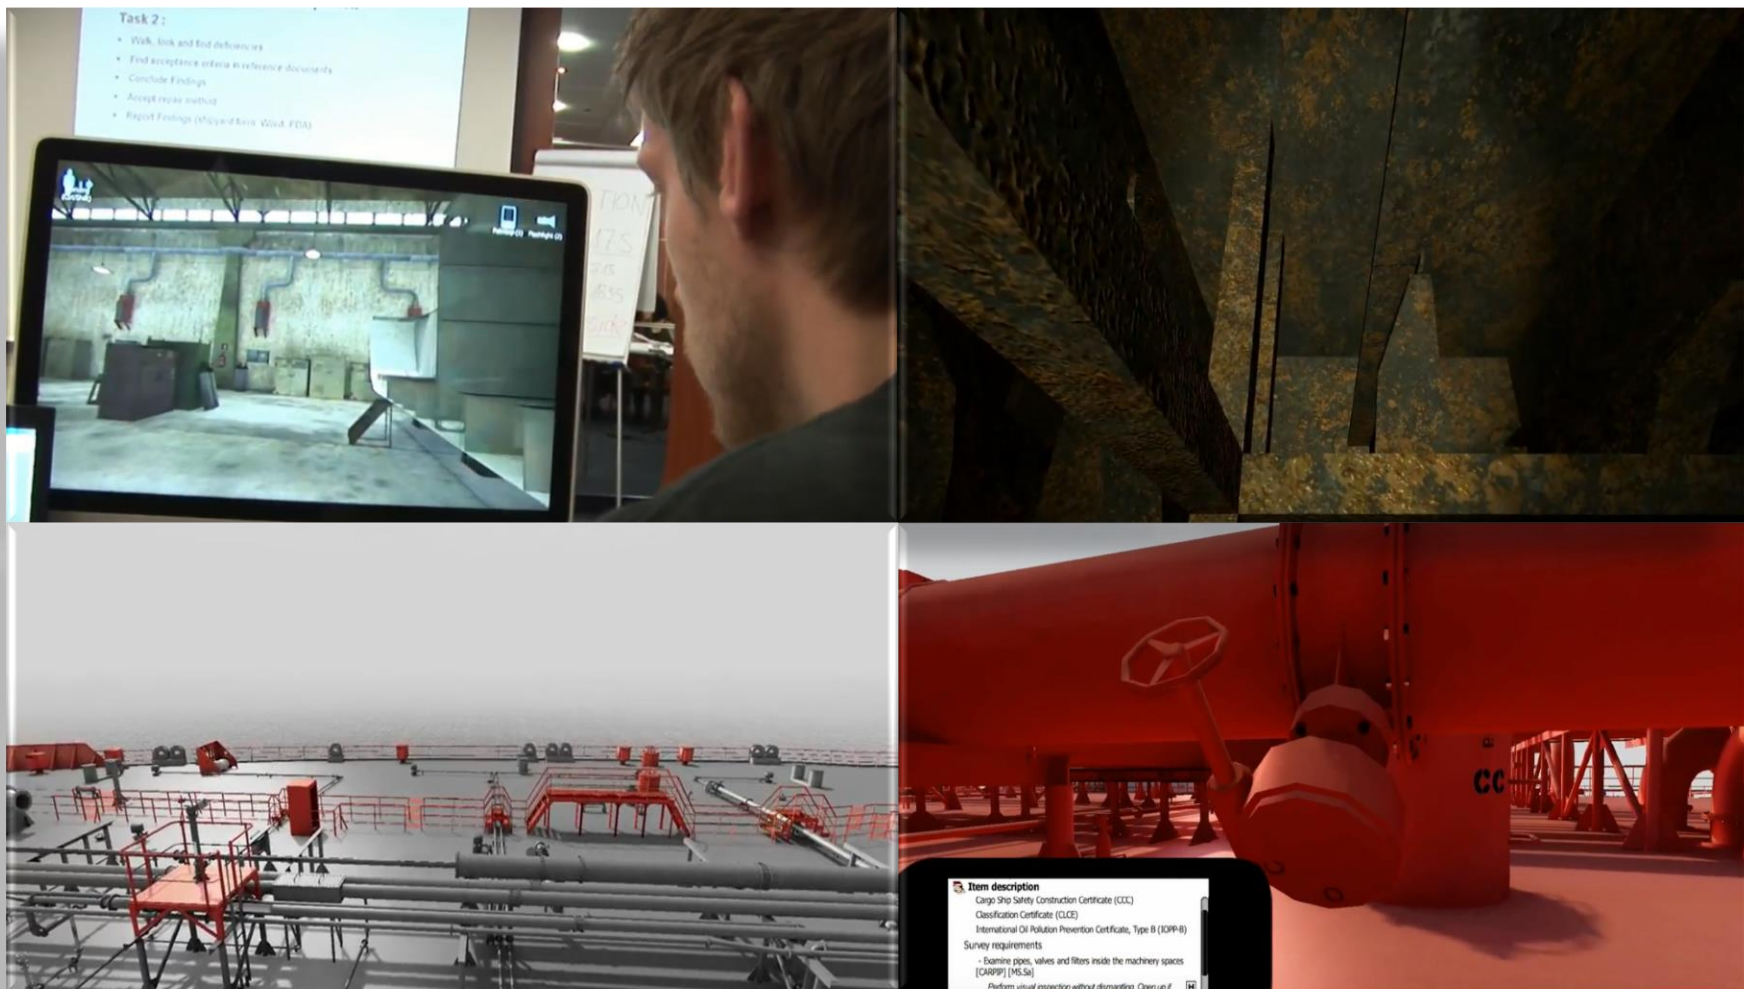

1	Anti-Fouling systems Convention (AFS) & Regulation 782/2003/EC	Nearly completed
2	Fishing Vessels safety & Directive 97/70/EC	It will be completed within the scope of Specific Contract 19 (ending 31/01/2019)
3	Liability & Compensation for Maritime Claims & Directive 2009/20/EC	Module is completed before 31/12/2018
4	Reporting, consultation and exchange of information on maritime incidents and accidents in SSN and CECIS	A specific Contract is now in place. It should be completed by 11/11/2018
5	Cybersecurity (focussing on maritime)	Completed
6	Maritime Security	Completed
7	Maritime Spatial Planning (in cooperation with DG MARE)	Module will be completed by 30/11/2018 at the latest

Module (subject)	Scheduled completion date	Launch date	Status/Comments
CIC on MARPOL Annex VI		26/07/2018	Completed
Paris MoU Inspection Procedures after PSCC51	10/09/2018		Completed
Paris MoU Radio Communication			On going (Dates to be confirmed)
MARPOL Annex I – All ships	30/08/2018		Completed
MARPOL Annex I – Oil tankers	30/10/2018		
Operational controls	30/09/2018		
Ballast Water Inspection (Paris MoU based, IMO and other MoUs)	End of 2018		

ROs monitoring	Development of a combined RO monitoring and oversight programme for MS in the EU – Workshop in 2019
Ship Security & Regulation 725/2004 on ship & port facility security	Finalised
BWM / Guidance on best practices on sampling	Being finalised
Implementation of the Marine Equipment Directive	New cycle of inspections on the new Directive started – experience to be gained
STCW Guidance - Certificates	Directive is quite open, - no standards can be produced – various issues dealt during workshops with MSs (i.e. registration of seafarers from third countries, electronic registration of seafarers)

A new approach on Training with the use of Virtual Reality

Why?

Support our user community.

Main objective - **overcome the difficulties of organizing 'on-the-job' trainings** for staff of the maritime administrations involved in ship's inspections.

... availability of ships in port, time spent on board, safety, disruption of the normal ship's operations, etc.

How?

Enrich EMSA's e-learning & in-house training portfolio.

Platform, **operative** by the 1st quarter of 2020.

Augment EMSA's training capabilities **not only** for comprehensive trainings such as Port State Control and Flag State Inspections **but also for specific trainings** such as Sulphur, Ballast Water Management, etc.

Availability?

A **wide range** of training modes such as:

Familiarisation with various international legislation,

Specific pre-designed scenarios,

Deficiencies-finding, among others.

Available **online** and accessible through individual usernames.

Access from **remote locations**.

Thank you
