

EMSWe MIG formalities mapping with customs messages

This document presents mappings between the following EMSWe Message Implementation Guide's (MIG) formalities and their equivalent customs messages from the Commission's DG TAXUD:

PoUS formalities	TAXUD message
CGM (Customs goods manifest)	IEP09
PPA (Presentation of the proof at arrival)	IEP04
SDA (Supplementary Documents at Arrival)	IEP56
SDD (Supplementary Documents at Departure)	IEP49
CAR (CGM Amendment Request)	IEP61
AES formalities	TAXUD message
REN (Re-export notification)	IE570
EXS (Exit Summary Declaration)	IE615
EXT (Exit notification)	IE590
MTX (Manifest at exit)	IE547
ICS formality	TAXUD message
NAC (Notification of arrival to the customs office of first entry)	IE3N06

These mappings should be used as reference by the MNSW (or other relevant national system) developers to translate the received formalities to the corresponding TAXUD messages or the equivalent national customs messages as defined by the national technical specifications (ref. EMSWe Regulation, article 5, par. 3(c)).

The following documents have been used as reference:

- EMSWe MIG, version 2.0.0
- UCC - Proof of Union Status, NMSW Interface Specifications, version 1.30 EN
- AES Phase 1 - Design Document for National Export Application (DDNXA), version 5.15.2-v2.00 EN
- ICS2 - Information Exchange Specifications, version 2.02

Appendices

The mappings are provided in the following attached DOCX files:

- CAR—IEP61 mapping-v2.0.0
- CGM---IEP09 mapping-v2.0.0
- EXS—IE615 mapping-v2.0.0
