

SSN Group meeting 22

Revision of the IFCD (v1.1)

Agenda item 22.3.2

Marta Lima / Senior Project Officer
Department C: Operations/Unit C.2.2

Lisbon / 29 October 2014

HLSG (10th, January 2014) agreed to initiate the process for the revision of the IFCD to reflect:

- The changes that will be implemented in SafeSeaNet (SSN) due to Directive 2010/65/EU on reporting formalities for ships in EU ports;
- Previous decisions of the HLSG; and
- The outcome of pilot projects.

The draft IFCD was discussed at the SSN Group meeting 21 (8 May 2014) and agreed the amendments with the exception of Chapter 2.6 and 3.4

EMSA was invited to continue the work on those two chapters for finalisation at the HLSG 12

The modifications are included in the draft IFCD version 1.1.1 presented in Annex (amendments are included in track changes with a footnote explaining the context)

- Chapter 2.6 - Cooperation with Other EU Systems - interface between SSN and CECIS
- Chapter 3.4 - Maximum access rights per role – data distribution (streaming mechanism);
- Access to SSN incident reports by CECIS users

Consequential or editorial changes in other chapters due to the amendments in chapter 2.6 and 3.4 are also proposed in track changes

[..\SSN 22.3.2 IFCD v1.1\IFCD draft v1.1.1.doc.lnk](#)

The SSN Group is invited to validate the amendments in track changes of the draft IFCD (v1.1.1)

The revised draft IFCD will be sent to the HLSG 12 (December 2014) for approval.
