

Integrated Report Distribution (IRD) phase 2

Facilitation of ship to shore reporting pilot project – 4th meeting

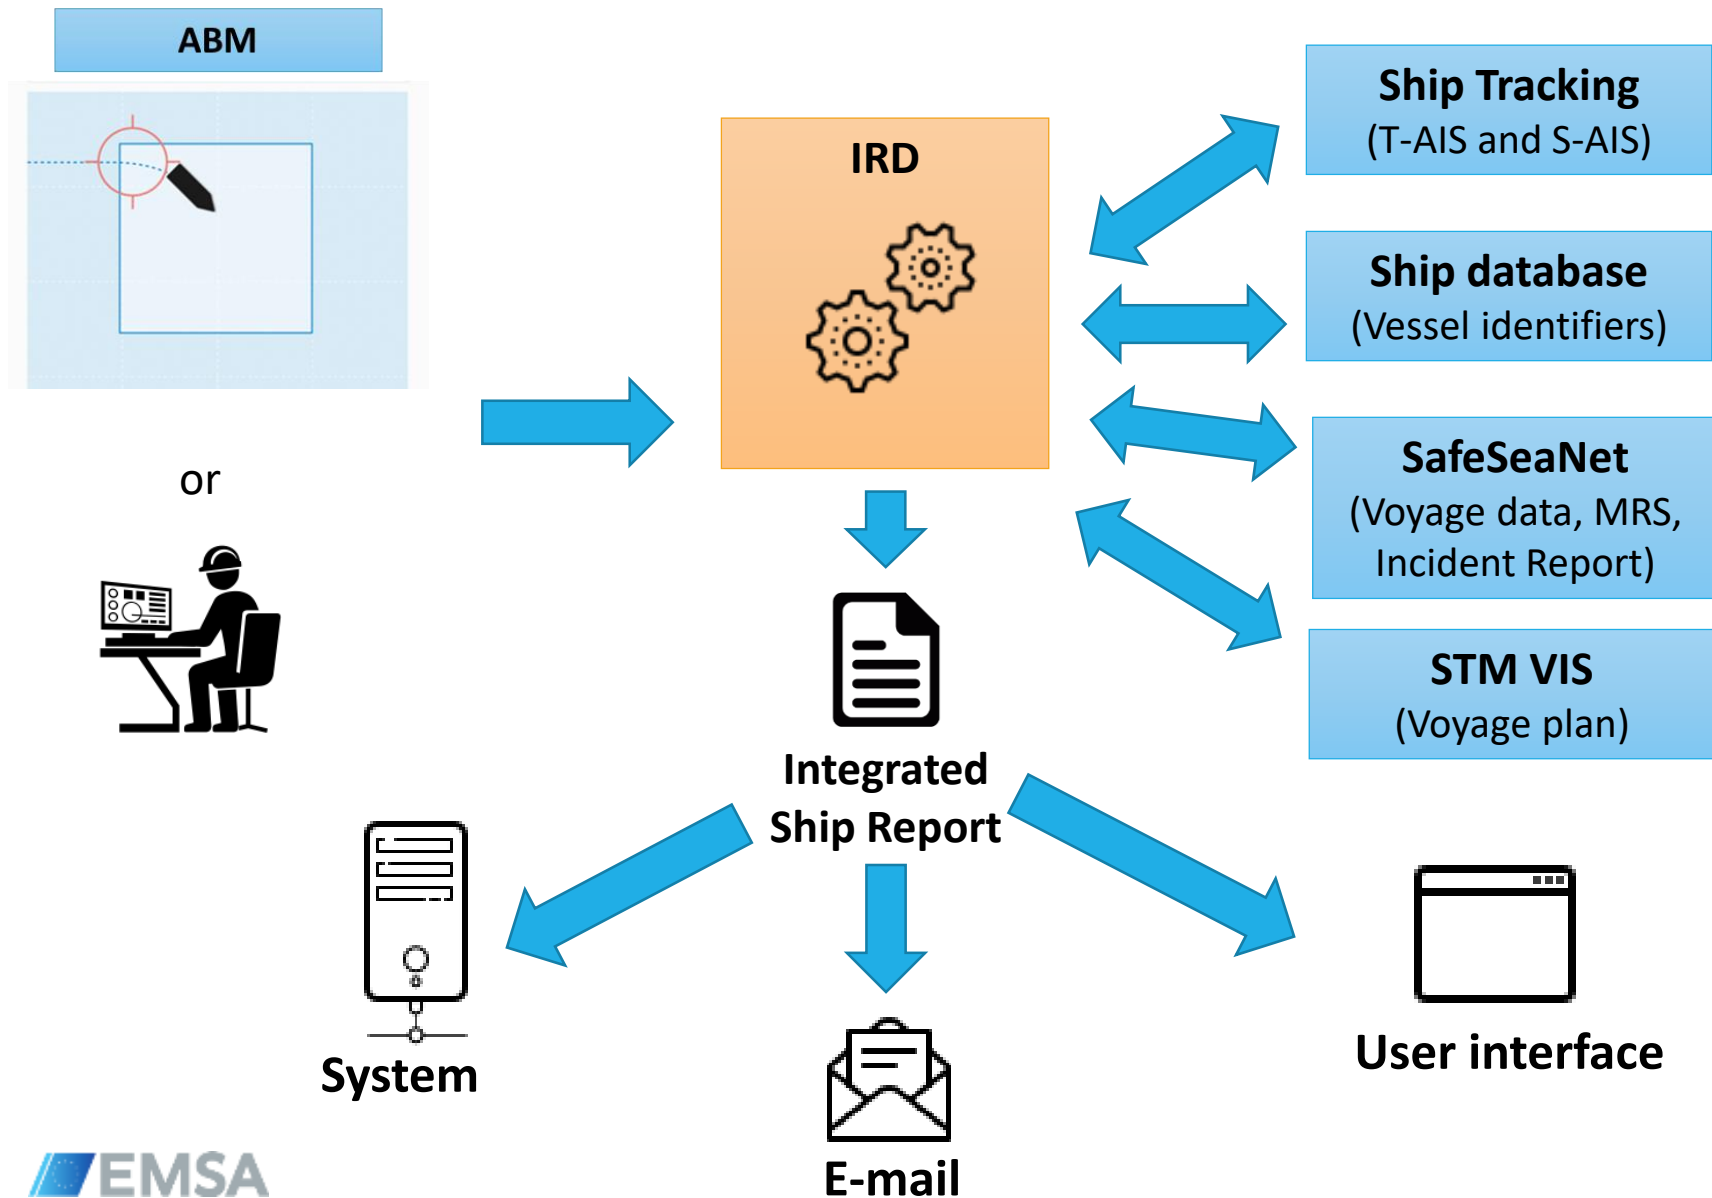

Lukasz Ziolkowski / Senior Project Officer
Department C: Digital Services & Simplification

Video conference, 10 December 2020

- For the purpose of the project, the IRD system is being developed. It uses existing services from the SSN Ecosystem to prepare and distribute to Member States' coastal stations reports on ships sailing in their areas of interest.
- The first version was deployed in July 2019 and presented on the last meeting.
- It was agreed during the last meeting that EMSA will further work on the IRD to reflect the comments received and to build system-to-system connections with national systems.

IRD phase 2

IRD phase 2 – what's new?

New features:

- ISR is available through system to system interface and e-mail, in addition to the current web user interface;
- IRD is connected to new sources of information;
- The content of the ISR has been upgraded as agreed with the project participants;
- New triggers for ISR;
- Possibility to request Hazmat and other SSN details via the IRD web user interface;
- Improvement of the web user interface (decoding of values, additional features, etc.).

LIVE DEMO

Member States are invited to:

- note the information provided and provide feedback on the IRD phase 2;
- participate in testing of the new version;
- inform EMSA about their willingness to establish system to system communication.
