

Appendix 18 Attached to the Tender Specifications

Invitation to tender No EMSA/NEG/17/2021 for “ICT Services for EODC”

Table of Contents

Introduction	1
Quality Criterion 1	1
Composition and Organisation of the team in charge of contract implementation	1
Quality Criterion 2	1
Update Web Services to allow EMSA client-applications to query EO acquisitions using polygons	1
Simplified Access to Signed Task Forms	2
Support new satellite Platforms	2
Improve ingestion process on EODC	2
EODC Maintenance	2

Introduction

This document provides the Templates to be used by the Tenderer in their bid.

The Templates support the evaluation of the Quality award criteria, as defined in the Tender Specifications.

Quality Criterion 1

Composition and Organisation of the team in charge of contract implementation

Quality of the composition and organisation of the team in charge of contract implementation, in particular in terms of suitability of the team dimension and of the profiles proposed for the implementation of the tasks.

Quality Criterion 2

Update Web Services to allow EMSA client-applications to query EO acquisitions using polygons

Quality of the technical proposal for implementing requirements, in particular the detailed description of the technical approach to be used.

Simplified Access to Signed Task Forms

Quality of the technical proposal for implementing requirements, in particular the detailed description of the technical approach to be used.

Support new satellite Platforms

Quality of the technical proposal for implementing requirements, in particular the detailed description of the technical approach to be used.

Improve ingestion process on EODC

Quality of the technical proposal for implementing requirements, in particular the detailed description of the technical approach to be used.

EODC Maintenance

Quality of the technical proposal for implementing requirements, in particular the detailed description of the technical approach to be used.
